SUMMARY

Computer Engineering student with a study focus on Cybersecurity and a practical track record in software development. Experienced in building full-stack applications using modern stacks (JavaScript/Next.js and PHP/Laravel). A fast learner enthusiastic about applying secure coding principles and problem-solving in a software developer role.

EXPERIENCE

❖ Web Developer, Pawcket Oct 2025 — Oct 2025
Surakarta

Developed and deployed a responsive company profile website for Pawcket. Utilized Nuxt.js (Vue.js) to build a fast and SEO-friendly server-side rendering (SSR) site. Managed the entire deployment and hosting process using Vercel.

❖ Full Stack Developer, Bodyfit Tengah Sawah Aug 2025 — Nov 2025
Yogyakarta

Led the full-stack development for a company profile website and gym management system (bodyfittengahsawah.com). Designed a custom authentication system on top of Laravel Breeze, including business logic middleware, validation, and role-based redirects. Built an Admin Panel with a comprehensive, multi-level Role-Based Access Control (RBAC) system for authorization at the panel, resource, and action levels. Optimized back-end performance by implementing an asynchronous queue system and task scheduling (Cron Job).

❖ Programmer, Universitas Amikom Yogyakarta Apr 2025 — Jul 2025
Yogyakarta

Designed and built a functional WhatsApp chatbot from scratch using JavaScript, whatsapp-web.js, and Baileys. Integrated chatbot logic to serve the specific information needs of the Computer Engineering Study Program.

EDUCATION

❖ Universitas Amikom Yogyakarta Jan 2022 — Apr 2026
Bachelor Teknik Komputer Yogyakarta

Conducted research and submitted a scientific paper titled "Prevention Label Enrichment in a Network Intrusion Detection System Benchmark Dataset" for publication in an international conference. Acted as a Technical Support Team member for a university-level Capture The Flag (CTF) competition. Served as part of the organizing committee for a Security Awareness seminar held in partnership with McAfee.

SKILLS

Communication	Teamwork
Problem Solving	Adaptability
Time Management	Python
JavaScript	Laravel
Next.js	Prompt Engineering
Visual Studio Code	Linux
Full Stack Development	Cybersecurity
